

XV Gateways With AlarmVision

A SMARTER APPROACH TO INTRUDER DETECTION

I Customer Guide

As a valued client of PEAK Alarm, you're likely already familiar with the ins and outs of professional security — the risks you face and the sacrifices you make to overcome them. Today, PEAK Alarm introduces a long-awaited leap in security capabilities that will revolutionize your intruder-detection strategy.

THE NEXT STEP IN SECURITY CAMERA ANALYTICS IS HERE: **DMP'S XV GATEWAYS WITH ALARMVISION™.**

The XV Gateway represents the cutting edge of commercial security technology, and PEAK Alarm is proud to be one of the first providers to offer this remarkable product. If you're looking for ways to upgrade your security system with more dependable deterrent measures, AlarmVision is the technology you've been waiting for.

| What Are XV Gateways?

The most important thing to understand is this: the XV Gateway is not a replacement for your surveillance system — it's an upgrade. XV Gateways are devices designed to patch into your existing camera technology, putting the advantages of AlarmVision analytics at your fingertips.

WITH ALARMVISION TECHNOLOGY, YOUR SURVEILLANCE SYSTEM CAN:

- ▶ Reliably distinguish between vehicles, animals, and human beings
- ▶ Split a protected area into defined zones with different protocols
- ▶ More accurately verify threats before triggering alarms

PEAK Alarm has implemented this technology across several of our most challenging protected sites.

OVER THE MONITORED TEST PERIOD, EACH OF THESE SITES SAW:

- ▶ Reliably distinguish between vehicles, animals, and human beings
- ▶ Split a protected area into defined zones with different protocols
- ▶ More accurately verify threats before triggering alarms

| How Does It Work?

XV Gateways with AlarmVision allow for a new level of customization in PEAK Alarm security systems. Through a strategic combination of devices, we can elevate your system with:

IMPROVED INTRUDER DETECTION

AlarmVision technology offers an unprecedented level of threat detection compared to basic motion detection systems. While beam sensors are frequently obstructed and cannot identify threats, the XV Gateway's analytics can distinguish between humans, vehicles, and animals, allowing for a tailored response to each event.

IMPROVED CRIMINAL DETERRENCE

AlarmVision plays a critical role in a variety of deterrent strategies. By combining the XV Gateway's zoning capabilities with IP cameras, your system can employ different threat responses based on proximity and threat level. If an intruder approaches the designated threshold, audiovisual warnings will likely scare them off before an alarm actually needs to be triggered.

IMPROVED THREAT VERIFICATION

Through a combination of predefined zones and advanced analytics, AlarmVision can intelligently interpret what your cameras are seeing. Video feeds are only streamed to monitoring teams once an alarm is triggered, improving your security while significantly reducing the false alarms you experience.

The XV Gateway With AlarmVision Features

- ▶ Person, vehicle, and animal analytics
- ▶ Support for both ONVIF and RTSP cameras
- ▶ Direct network connection and camera detection
- ▶ Up to 4 TB of internal storage (XV-96)
- ▶ Up to 96 MP processing (XV-96)
- ▶ Up to four detection regions per camera

Is This Upgrade Right for You?

PEAK Alarm wants to ensure its clients are thoroughly protected. There are countless business owners who would jump at the chance for a surveillance system upgrade if not for the upfront cost of a technology overall. Now, XV Gateways with AlarmVision allows you to achieve that cutting-edge functionality using much of the technology you've already invested in.

XV GATEWAYS WITH ALARMVISION MAY BE RIGHT FOR YOU IF...

- ✓ Your commercial property spans multiple lots or buildings
- ✓ You're looking for a cost-effective starting point for your security
- ✓ You need a scalable, yet comprehensive surveillance solution
- ✓ Your previous attempts at deterrence have been unsuccessful
- ✓ You've already built up much of your surveillance system
- ✓ The size of your products makes surveillance a challenge
- ✓ You're concerned with the upfront cost of new cameras
- ✓ You simply want the best technology available for your business
